

SEC-Required Report on Routing of Customers Orders (Rule 606) For Quarter Ending September 30, 2018

Integrity Brokerage Services has prepared this report pursuant to a U.S. Securities and Exchange Commission rule requiring all brokerage firms to make publicly available quarterly reports on their order routing practices. The report provides information on the routing of "non-directed orders" - any order that the customer has not specifically instructed to be routed to a particular venue for execution. For these non-directed orders, Integrity Brokerage Services, through the routing algorithm in Go-Trader's software, has selected the execution venue on behalf of its customers.

The report is divided into four sections: one for securities listed on the NASDAQ Stock Market, one for securities listed on the New York Stock Exchange, one for securities listed on the American Stock Exchange, and one for exchange-listed options. For each section, this report identifies the venues most often selected by Integrity Brokerage Services, sets forth the various types of orders routed to the venues, and discusses the material aspects of Integrity Brokerage Services's relationship with the venues.

Securities Listed on the NASDAQ Stock Market

Summary Statistics:

Non-directed orders as percentage of total customer orders	100.00%
Market orders as percentage of total non-directed orders	74.26%
